

research that requires a large amount of electricity (for the partial lifting of electricity saving practices and notes on resumption of experiments, please refer to the notice by the acting director of the Headquarters for Disaster Countermeasures dated March 24 as well as the notice by the Director General of the Division for Environment, Health and Safety dated 25 March). In addition, the Power Crisis Countermeasures Team, which has been set up under this Headquarters, will inform you of the necessary actions as appropriate. Respond to information provided and take the required actions.

- The Environmental Science Center has restricted recovery and treatment work of waste fluids to reduce power consumption. Take note of this restriction in performing experiments that could produce waste fluids (for the latest information on the recovery and treatment work, please visit the Center's website)
- Thefts and forced entries may occur, taking advantage of

members affected by the earthquake and tsunami from official duties (please refer to the

2011 Great East Japan Earthquake.”
